## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

2. The drawings filed October 21, 2003 appear to be informal and are acceptable for examination purposes.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 5-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Eymann et al ('524) or Kipp ('709).

The claims are considered to be met by either Eymann et al ('524) or Kipp ('709) who disclose a system for measuring the distance between two signals and determining the range to an object of interest. Eymann et al ('524) discloses an FMCW radar arrangement including, inter alia, determining the distance between the left side and the right side of a modulation frequency (see Figure 2). In addition, Eymann et al ('524)

discloses use of a bandpass filter (see 24 in Figure 6) to isolate the signal bandwidth around the modulation frequency. Kipp ('709) discloses a radar ranging system, including, inter alia, use of a bandpass filter (TBPF 42 and 50) for isolating a signal frequency to the left (lower) and right (upper) of a beat frequency. These left and right frequencies are processed to determine the range to an object of interest.

***Allowable Subject Matter***

5. Claims 1-4 are allowed.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
